University

North Shore Community College,   *2017–2018*
Computer Science

Certificates

01/22–08/22: **Codecademy** *Front End Engineer Certificate*
08/22–09/22: **Codecademy** *React Certificate*
10/23–10/24: **App Academy** *a/A Certification*

Skills

- **Javascript**
- **React**
- **Flask**
- **Express**
- **PostgreSQL**
- **Git**
- **Python**
- **Redux**
- **SQLAlchemy**
- **Sequelize**
- **SQLite3**
- **AWS**

Projects

Digital Front
E-Commerce Store

- Built using a **React** frontend for an interactive user interface, a **Flask** backend for handling API requests, and **AWS S3** for image storage and retrieval.

- Allows users and businesses to create and manage products and stores, including uploading images, setting prices, and managing inventory. Users can browse, select, and view store details and featured products.

- The app leverages **Redux** state management, **SQLAlchemy** for database interactions, and supports user authentication and store ownership validation, ensuring data consistency and user-specific product listings.

Huthunt
Airbnb Clone

- Developed a full-stack Airbnb clone using **React** for a fast and responsive front end and **Express.js** for RESTful API back end.

- Implemented **Sequelize** ORM to manage **PostgreSQL** database interactions, ensuring efficient data retrieval and user-friendly experience

- Integrated **Redux** for global state management, enabling efficient handling of user data and property listings across the application.
